ENGINEERING**

Dedicated Expertise.

CHEMICAL INDUSTRIES

Anderson Engineering's unique and innovative engineering solutions have contributed to the longstanding relationships we have built with our clients in the chemical processing industry. We understand that the primary concerns in this industry are safety and reproducible formulations. Our engineering and project management expertise are world class.

We offer our clients a complete solution for process and automation design, fabrication and manufacture of the equipment together with the installation and commissioning of turnkey projects. Our extensive range of customised mixing equipment is a core strength of Anderson Engineering and an integral part of our project turnkey work. Its the foundation on which our reputation has been built.

CHEMICAL INDUSTRY SOLUTIONS
