ENGINEERING**

Dedicated Expertise.

MIXING EXPERTISE

Our extensive range of customised mixing equipment is a core strength of Anderson Engineering and an integral part of our project turnkey work. It's the foundation on which our reputation has been built. We have conceptualised, designed and manufactured mixing vessels to exacting standards, over many decades.

We have designed and engineered some unique and highly innovative mixing solutions which deliver the most efficient means of incorporating a range of combinations of liquids, solids and gases. Our Anderson Contramix Vessel, Andstrom Blender, Andpure Magnetic Mixer and Andjet Mixer are key product solutions to various mixing challenges. We also use this base of expertise to custom build mixing solutions for your specific needs.

WE OFFER A RANGE OF EQUIPMENT FOR MIXING IN VARIOUS PRODUCTION PROCESSES

These include:

- Ribbon Blending
- Static Mixing
- Impellor Mixing (Agitation)
- Low Shear Mixing
- In-Line Blending (continuous blending)
- High Shear Mixing
- Colloid Milling
- Gumming Agents

RECENT MIXING SOLUTIONS:

Cough syrup
Mayonaise
Whiskey
Stock cubes
Corbopol
Shoe Polish

We have the expertise to develop equipment to combine a range of materials to achieve homogeneity, control of mass transfer and the control of heat transfer according to our customers' requirements. We are experts in ultra-hygienic solutions of the highest quality and finish which offer ease of cleaning and product recovery. We offer combining solutions for:

- solid with solid
- solid with liquid
- liquid with liquid
- gas with liquid
